PROJECTS

Consumer complaint analysis

Cleaned and organized consumer complaint data using Excel functions (VLOOKUP, HLOOKUP, INDEX, MATCH) and pivot tables. Developed a dashboard for effective visualization of key metrics, facilitating data-driven decision-making.

Sports data analysis

Executed comprehensive sports data analysis solely utilizing Excel. Cleaned, organized, and applied statistical techniques to uncover insights. Leveraged Excel's functionalities for efficient data processing, contributing to a nuanced understanding of performance metrics and trends.

Retail Data Analysis

Performed robust retail data analysis using SQL. Extracted, transformed, and analyzed data to derive actionable insights. Developed complex queries and utilized SQL functions to uncover trends, optimize inventory, and enhance decision-making processes.

Mobile manufacturer Data Analysis

Conducted comprehensive data analysis for a mobile manufacturer using SQL. Applied advanced queries to extract valuable insights on production, sales, and market trends. Utilized SQL functions for data transformation and optimization, contributing to informed decision-making in the mobile manufacturing process.

Sales Data Analysis

Executed a thorough analysis of sales data using Power BI. Designed dynamic dashboards and reports to visualize key sales metrics. Employed Power BI functionalities for data modeling and interactive data exploration, resulting in actionable insights for strategic decision-making in sales operations.

E-Com Data Analysis

Engaged in a comprehensive E-Commerce data analysis project using Power BI. Crafted visually compelling dashboards to interpret sales, customer engagement, and product performance metrics. Leveraged Power BI's advanced features for robust data modeling, providing actionable insights to drive strategic decisions within the E-Commerce domain.
